ARNOLD ENGINEERING & DEVELOPMENT CENTER

Arnold Engineering Development Center is the world's largest and most complex collection of flight simulation test facilities. The 4,000 acres that comprise AEDC are part of the 40,000 acre Arnold Air Force Base. The base was dedicated June 25, 1951 by President Harry S. Truman. AEDC has tested virtually every high performance aerospace system the Department of Defense has developed since the mid-1950's.
Working for AEDC, there are
121
active duty
military, 264 government civilian and 2,006

contract employees.

Their mission is to provide their customers with the world's most effective and affordable aerospace, ground test and evaluation products and services, to ensure Arnold Engineering Development Center 's ground test facilities, technologies, and knowledge fully support today's and t
omorrow's customers.
